

Environmental Policy

Amenities Environmental Services recognises the impact of the transport, treatment and disposal of Wastes on the local and global environment and on its carbon footprint.

We are committed to reducing this impact and recycling / reuse challenges through the continual improvement of our services, supplies and waste management solutions.

The Policy provides the framework to achieve the company's intentions and underpins its ISO 14001:2015 Environmental Management System through its commitment to the protection of the environment by;

- Ensuring that we are aware of environmental legislation and comply with all regulatory requirements pertinent to our activities.
- Reduction of environmental impact through the provision of environmental and economic controlled practices of waste recycling and reuse.
- Promote good environmental practices and solutions for producers of waste products to define, identify, contain and store waste correctly in order to maintain safe handling and prevent pollution.
- Influence transport to optimise emission reduction through reverse logistical collections and deliveries while promoting safe transportation practices on the public highway.
- Ensure equipment service supplies and installations are executed by technically qualified, competent and trained staff and that suitable instruction, training and supervision is provided.
- Encourage environmental practices to reduce the impact on landfill sites and consider heat recovery as an option where recycling may not be appropriate.

A copy of this policy shall be made available to external interested parties upon request.
